

**Maria Bjurberg, born 1970.**

Senior consultant, PhD and since 2010 Head of gynecological and urological oncology at Skåne University Hospital in Lund, Sweden. Specialist in oncology and in gynecological oncology. My main area of professional interest is radiotherapy and cervical cancer. I completed my thesis titled “FDG-PET in cervical cancer – translational studies” in 2010. Currently serving as president of Swedish Society of Gynecologic Oncology, SSGO, and also scientific secretary of Swe-GCG.

I am currently serving my second term in the NSGO Board and am very proud to have been selected as candidate for the up-coming election for president-elect. If elected I would continue working for an increase in Nordic collaboration concerning both clinical guidelines and our continuing medical education. Another important issue that I would like to work for is how to increase the proportion of patients treated within a clinical trial. To do that we need to continue and to develop our work with clinical trials.
