

I've been working as a senior consultant in gynecologic oncology in the dept of oncology at Linköping University Hospital since 2014 with a special interest in brachytherapy. I've had the honour to be a board member of NSGO since the annual meeting in Bergen 2016 and I am currently the editor of the organisation's newsletter. Together with the board I am engaged in the planning of our next annual meeting in Lund Sweden 2018, and I hope I will have the opportunity to continue my commitment to this highly relevant and important organisation.
